

## Benefits of a Professional Photographer.

The number one benefit of using a professional photographer is the quality of the photographic memory created. Through the use of high end equipment, lighting and processing. Combined together with a knowledge of the best industry trends, standards and supplies to create a truly astound-

ing photographic memory. That will not only amaze and intrigue all viewers today and tomorrow but for the life of the photographic memory. The second benefit is it allows you to concentrate on other things like enjoying the event and insuring your guest family and friends are enjoying themselves as well. The third benefit is allowing you to be a part of the photographic memory. Now and when shared.

## Sky Island photography. The Difference

Feel free to call us we would love to talk to you . (712)326-0514

Hello and welcome to SKY ISLAND PHOTOGRAPHY. We are a small group of independent freelance photographers skilled, trained and dedicated to the art of photography and creating the best photographic images possible for your event. What makes us different from other photographers we are not studio photographers but world travel photographers

capable of delivering outstanding results no matter the project. We have an experienced photographer for you and your event. Our photographers come to you we shoot when where and what it is you want images of with in the limits of the law and or the venue so you can be free to enjoy and do what ever it is you do. If you desire we can supply you with places for your customized photo shoot at additional cost to you be it a mansion on a lake ,Cathedral church, boat or hotel suite the options are only limited buy your imagination and finances. We are very discrete and diverse group of photographers be it a secret project or a honeymoon for two we do our best to provide you with the best photographic images with the smallest foot print as possible on your event no matter the event venue or customer we secure all our images and digital down loads with the latest security techniques to insure your images don't end up on the world wide web unless you want them too.
